

Wanted: Data Management Intern

Join the Bioeconomy Institute at Iowa State as an undergraduate Data Management Intern! Assist with data management for agronomic, environmental, and engineering research projects including: C-CHANGE Grass2Gas, STRIPS and COBS.

Duration: Academic Calendar 2023, with the possibility of extension for 2024

Hours per week: 7-20*

Compensation: \$13-16/hr, depending on experience

**Work will be conducted in-person at the Biorenewables Research Laboratory on campus for 30-60 days and then hybrid remote thereafter.*

Learn How To:

- Scrape data from Excel using R
- Identify and flag data and metadata
- Evaluate data management plans
- Operate MS Access and PostgreSQL databases
- Assimilate data from many sources to build cohesive datasets
- Communicate with partners from diverse disciplines
- Manage digital photo resources

Qualifications

- Intermediate proficiency with Excel
- Basic familiarity with R or significant experience with another coding language
- Attention to detail
- An interest in scientific data

Demonstrated experience in these areas is also helpful:

- Intermediate proficiency with R
- Experience with scientific datasets
- Experience working with agronomic, environmental, or engineering data

How to Apply

Email resume, two references and cover letter to Dr. Matt Stephenson, Data Management Specialist, mattstep@iastate.edu.
